Always compatible!

One for all and all for one!
Greater flexibility with EnviteC SpO₂ sensors

*FlexMon*® – the ingeniously simple solution

The new system developed by EnviteC, *FlexMon*®, is the crucial step towards the efficient use of sensors. In future the individual EnviteC SpO₂ sensor can be connected to any device in a family of monitors, thus significantly reducing the number of sensors required. *FlexMon*® sensors not only reduce costs considerably, they also save an enormous amount of time during operation. Both, users and hospital purchasers, benefit from this simplification.
FlexMon®

The advantages
• Lower investments
• Greater flexibility
• Cost savings
• Optimized stock-keeping
• Better overview

Standardized sensor range
The EnviteC SpO2 sensors listed here are available with the new standardized plug-in connector.

FingerClip · SoftTip®
Ear sensor · Disposable Sensors

Different monitor versions
FlexMon® enables the sensors to be used on a wide variety of monitors with different connector options. Both portable and stationary individual monitors and device systems can use the EnviteC SpO2 sensor range alternately.
